

Standard Corning® Gorilla® Glass Sizes

SnapCab, in collaboration with Corning, is opening the door to beautiful, modular, progressive elevator and wall panel designs with thin, lightweight, damage-resistant panels. The SnapCab modular system allows architects to freely design unique interiors while making it simple to customize. There are currently 12 standard Gorilla Glass sizes to build your interior design. Custom sizes (up to 47.25" x 80.3" and 57.8" x 73.6") are also available.

Gorilla Glass is a blank canvas that allows you to exercise your creativity: Specify any pantone color for an exact match. Provide your own high resolution imagery or logos. Choose from one of our patterns and personalize the magnification and colors. Choose from one of our wood or stone images, or specify your own.
